

As your role in protecting the public's airwaves, you need to hold many more public hearings before increasing the percentage of ownership by one media corporation within a single community. The public is opposed to the steps you are taking and have taken as have been apparent from the three hearings you have had so far. You AT LEAST should have one in every state, I would happily pay as an American Taxpayer for you to be flown and lodged in every state capital because nothing could be more important to me than stopping these blantly obvious handouts to the big 6 media conglomerates I take it I don't need to list them. These are my airwaves not the corporations and as the public has said we only see further consolidation as hurting the media duty to inform the public on crucial issues which in turn they can formulate opinions and vote. Please resist the NAB and other's lobbyists even if they spend a million dollars a year in vacations etc. Tell them you are in place to protect the public interests in just such an occasion. Please consider my comments and understand where the American people stand on this very, very important issue.
